

INDUSTRIAL STRENGTH INTEGRATED INNOVATION

Design and Manufacturing
of integrated hydraulic
systems for the most
demanding industrial
applications.

Industrial

About Us

Flodraulic Industrial was founded in 1980 under the name of Oleobi and became a leading player in engineering and manufacturing intelligent power units for industrial applications worldwide. The integration of hydraulic power and electronics makes Flodraulic Industrial the ideal partner for highly complex projects with high technical content. This is why Flodraulic Industrial boasts advanced process and product certifications from the most prestigious international authorities such as ISO 9001, Machinery Directive, PED Directive, ATEX Directive, etc.

The complete system testing is carried out on our CE-certified test benches or on-site where the machine is installed. This ensures maximum reliability, quality, and efficiency to our projects.

We meet our customers' needs by taking care of every single detail: from design to production, from installation to after-sales service.

Solutions

Manifolds

Based on customer specifications, Flodraulic Industrial designs and manufactures hydraulic manifolds of various sizes and flow rates. Product testing is ensured among the whole production process, both before the delivery and on-site during the installation to guarantee maximum performance and safe use for operators.

Hydraulic Power Units

According to the customer's specifications Flodraulic Industrial designs and manufactures integrated systems for applications requiring high power management, such as:

- **Industrial (plastic molding, metal processing, etc.)**
- **OnShore & OffShore**
- **Mobile**
- **Marine & Submarine**
- **Oil & Gas**
- **Energy**
- **Recycling**
- **Drilling**
- **Tunnelling**
- **Defence**

Each HPU (Hydraulic Power Unit) is fully tested and certified on-site in compliance with the applications specific technical requirements.

Test Benches

Test benches developed for:

- **Pumps & Motors up to 500 kW**
- **Proportional Valves**
- **Directional Control Valves**
- **Solenoid Valves**
- **Servo Valves**
- **Integrated Systems**
- **Cylinders**

Service & Maintenance

Floodraulic has a team of specialized operators dedicated to the service and maintenance of any type of hydraulic systems, any time. Upon customer request, we provide worldwide assistance in machine assembly, commissioning, and periodic maintenance.

For offshore operations, selected members of our team are **BOSIET**-certified, holding the internationally recognized safety training required for work on offshore oil, gas, and energy platforms.
